SX57 MONITOR STAND

First, install the left and right uprights (**Step 1**). Do not tighten them to the chassis yet; this will allow for free movement from left to right, ensuring proper alignment for the next step. Next, proceed to **Step 2** to install the horizontal support. Once everything is in place, tighten all the bolts to secure the structure. You can adjust the stand to be closer to or further away from the wheelbase.
